Flashtool-0.9.16.0-windows.exe Full Version

After that, if I try to run Emma.exe, it freezes - no window is displayed, but the executable is still running in the task manager. Any ideas? EDIT3: I tried running the Emma app - it doesn't show up, but it seems to work. It has something to do with my configuration. When I run the software, it launches the Emma app which is in a directory in my documents folder. When I start Emma and click on Emma.exe it still works. This is strange. EDIT4: I have this Emma app on my desktop (which doesn't show up in the app list) dd2bc28256
