Trimble is North Americas top-selling provider of survey, GNSS and mapping solutions. Trimble s proven technology, coupled with its global service and support organization, enable customers in more than 120 countries to realize more value and productivity in their work. For more information visit [www.tds.com](http://www.tds.com) . Trimble is North Americas top-selling provider of surveying, mapping and GPS technology. Trimble s proven technology, coupled with its global service and support organization, enable customers in more than 100 countries to realize more value and productivity in their work. For more information visit [www.tds.com](http://www.tds.com) . TDS Survey Pro is one of North Americas leading field data collection software packages. Part of the Tripod system, Tripods Customer Care support is backed by a real 800 number, staffed by real people and is available 24 hours a day, seven days a week.[www.tds.com/pro/](http://www.tds.com/pro/) Products and information are distributed throughout the world by our partner distributor, Tripod Data Systems. If you would like more information, please click on this link, call our distributor at 1-800-843-1411, or visit our website. TDS Survey Link Software automatically and regularly transfers the data from your data collector to your laptop or desktop in a.JOB format. Unlike a direct physical connection, it does not require any driver or software to be installed on your PC or laptop. Simply plug the data collector into a USB port and use this software to link your data collector data to your laptop. The usefulness of survey field equipment is greatly improved with Link software because the data collected in the field can be analyzed and processed after the data is transferred to the computer in a.JOB file. Link can even help determine the most efficient way to transfer the data to your database.

**Tds Survey Link Software**

Sunnyvale, Calif., March 22, 2004 -- Tripod Data Systems (TDS) announces the launch of Tripod Data Systems' Survey Pro 4.0 software, which was released today. Tripod's Survey Pro 4.0 is the latest version of Tripods Survey Pro, which also offers many new features and enhancements including programmable drill offset workflows, the ability to import aerial photographs and topo quad sheets, and image management capabilities. Sunnyvale, Calif., March 22, 2004 -- Trimble (NASDAQ:TRMB) today announced the latest release of Tripod Data Systems' Survey Pro 4.0 field data collection software package. Survey Pro 4.0 simplifies the workflows of digital surveyors in the field, increases overall efficiency, and has numerous new capabilities. Sunnyvale, Calif., March 22, 2004 -- Tripod Data Systems (TDS) today announced that it will host a free webinar for Tripod Data Systems' Survey Pro and Tripod Data Systems' Survey Link software users. The webinar will teach users about Tripods Survey Pro 4.0 and Survey Link, which will be available March 31. Many of the topics covered in the webinar will be applicable to users of Tripods Survey Pro 5.0 and Tripods Survey Link. The webinar will be held on April 14 at 12:30 p.m. (PST). Sunnyvale, Calif., March 15, 2004 -- The new version of Tripod Data Systems' Survey Link software will be available in early April. A new interface and an updated map data base will make it easier for surveyors to import a base map such as a topo quad sheet, an aerial photograph, a GIS data base plot, or even a boundary survey or deed plot that has been computed prior to going to the field and be able to orient your field work to the map while in the field. This should be very helpful in finding your way around a site whether on a boundary survey or on a construction site (where you can have something like a parking lot or a road alignment underlying your current field work). However, it does not appear at this time that we can make the base mapping and the current fieldwork map interact with each other. 5ec8ef588b
