overall this is a very good drum kit library. there are a few problems that are not so easy to fix. personally i think ni took some shortcuts in this library, but that is not the only reason why this library is not as good as others. it may be listed as a drum library, but you can use the sounds for more than just drums. in fact, the kit was set up to be a total package. in addition to drums, there are also pads, percussion, bass, guitar and more. not that there arent many drums in there, but these are usually mid to high key, which doesnt lend itself to using a pad for a low key sound. a couple of problems with it are that it has no low kicks, the snare is to detailed, and has all the higher drums on the same set. the non-drum kit sounds arent bad, just not compelling. sound design is pretty much what it is: if you are looking for something that is worthy of a top tier drum library, you will be disappointed. if you are looking for something that is going to impress your friends, its good. the drummer gear bundle is a set of four plugins for ableton live that presents you with a drum kit that

comes with both a preset and a user-friendly drum pad controller. it offers you 41 drum kits that you can mix and match to sound like the real drum set. this library is the best free vst/au plug-in on this list because of the combination of a good drum pad and nice samples. it offers you four programs which you can select which drums you use. there is a drum kit preset, which consists of a kick drum, snare drum, tom tom, and cowbell sound. then the drum kit user-friendly comes with all drum drums for a variety of styles ranging from rock to pop and jazz. finally, you have a drum pad option that comes with a preset and it is very easy to use as well as very responsive.
