the best part is that you can create a career plan in a way that fits your own life and career path. whether you are creating a career for yourself, to design as a profession, or to provide as a service to clients. it doesn't matter what path you choose, this book will help you design your career. every career path requires a journey and you need to have a plan to guide you through that journey. the journey needs to be your own, it needs to be a unique experience, and it needs to be an experience you can point to in 5, 10, or 20 years from now. just think of it like mapping your city. we already know which streets and paths we need to travel, but it takes a surveyor to create a detailed map. learning becomes almost a part of your daily life if you choose to do so. with the world becoming a flatter place, more opportunities are opening up for the social engineers and information security professionals of today and tomorrow. in this book, you will be learning a lot of tools and techniques that will help you navigate both the world of learning and the world of job. you will be learning how to not only navigate the subjects, but how to create a career plan that supports your goals for the future. you will also learn how to design and author your own materials, make your own choices, and how to reflect upon your choices. a career plan should be a very detailed roadmap with clear goals, steps, and milestones for the future. if this career plan sounds "familiar", it is because we are introducing the format that is used in the industry today. this book is like a blueprint for designing a career plan, a reflection of what is being done in the industry, but how this book is bringing a whole new approach to the whole concept.
