Duane's Ophthalmology Pdf ##TOP## Free 14

this is the best university of iowa ophthalmology residents resource. this site will save you lots of time. it contains many well-written and clearly organized e-learning modules for all types of diseases. for the residents who are not taking classes at the university of iowa, this is still a good place to start. however, for future residents, you would probably do well to go directly to the university of iowa department of ophthalmology's website, as there are great resources on there that can save you a ton of time. all the materials are organized into different categories such as the anterior segment, posterior segment, retinal diseases, posterior segment infectious diseases, retina, and glaucoma, the university of iowa department of ophthalmology has one of the largest online repositories of case presentations and clinical atlases. whether you prefer learning through case studies, looking at images in an atlas, or taking guizzes, eyerounds.org is a great place to start learning about eye disease. there are links to gonioscopy.org, which has tons of pictures and videos teaching the skill of gonioscopy, there are tutorials about clinical skills, literature reviews, and detailed case discussions. this is by far the highest-guality ophthalmology educational resource produced through an academic institution. the university of iowa department of ophthalmology has one of the largest online repositories of case presentations and clinical atlases. whether you prefer learning through case studies, looking at images in an atlas, or taking quizzes, eyerounds.

it is my hope that this list of organizations will inspire you to explore your own possibilities and consider them when looking for an ophthalmology fellowship or residency program that you are interested in. although most of the courses found on ophthacademy.com can be found elsewhere, there are some quality items that are not readily available in other places. for instance, the videos in the retina, ocular surface, and glaucoma videos categories are all well done, the ketamine videos are informative and well presented. the hemorrhages video provides some of the most clearly articulated, precise explanations of a varix that i've ever

heard. the sites mentioned are of higher quality and will bring you up to speed on the various tests and methods to examine the eye. also, it is designed for people who are not attending a residency and want to learn more on the topic. although the ophthalmology textbooks will teach you most of this information, they are confusing and very hard to read. this site also helps if you're a resident getting ready for an exam. there are sections on each okap that teaches you what test to prepare for, what to expect in the exam, and some tips on how to deal with the anxiety associated with exams. it will help you learn how to approach questions, understand test formats, and how to deal with particular problems that you might face. nowadays, this is one of

the most powerful web tool for learning and teaching. it is a wonderful site for ophthalmologists because it provides practically everything you need for their education. we are happy to recommend this website to all ophthalmologists. 5ec8ef588b
