I've never been to Chicago and I'm not planning on going. I was thinking of going to Italy in September. I'm not sure if I would want to go to all the cities or just some or some and not some etc. Is there any good place to start exploring? Anyone have a good idea of an Italian holiday? There are lots of tours which include Florence and Rome but it's more of a cultural activity than a holiday by itself. If you can afford, go to Venice and rent a car for 3 or 4 days. In Rome, you could of course take a tour with a car or hiring a driver yourself, i.e. St Peter's Basilica (one of the most important in Italy), Vatican Museums, Colosseum, Sistine Chapel and the Pantheon and then a tour of the historic centre and see the Trevi Fountain and Piazza Navona etc. Age-related changes of plasma and platelet membranes of central and peripheral circulation in the rat. Aging in the rat has been associated with changes in lipid profiles and in the response to stressors. In the present work, we determined in rats of 1, 5, 10, and 24-month-old ages the lipids composition and the lipid peroxidation and protein oxidation products of the platelet and plasma membranes of the central and peripheral circulation. The data show alterations in central circulation with aging, manifested as an increase in triacylglycerols, cholesterol, total fatty acids and unsaturated fatty acids in the white blood cells membranes. Also, an increase in the levels of protein oxidation products was observed, and the changes were more pronounced in the platelet membranes of 24-month-old animals. In peripheral circulation, increases in the

levels of lipids oxidation products were observed in the platelet membranes of all groups, as well as in the cytosols and plasma membranes of the 1-month-old animals. 79a2804d6b
