[Click here to read this review at Software Informer's website] Here's a collection of 25 atmospheric planet wallpapers - each one a separate planet in a different star system. Hello, again! We are still continuing with a series of breathtaking space wallpapers for your desktop. Here are 25 gorgeous images that you can use to create your own windows 7 theme. Each one is an individual wallpaper that tells a story about the distant worlds. These planets in space were presented in 5 categories. Top 10 Wallpapers - Views of Earth and Other Living Worlds Earth is the only planet around which we can stand. We enjoy the beauty of nature in our backyard and we understand the crucial role our planet plays in our very existence. However, Earth is not the only planet in the solar system that is worth watching, and we decided to make a collection of wallpapers that represent all the different planets. In this section of the article, you will see the worlds that can only be seen from outer space. They are different from our earth, they are lifeless and frozen, and they are not in the same place as we are. Earth - This is the only planet we can see in our backyard. In fact, our home is located in a planet, and everything that we do has its effect on the environment around us. With this in mind, we decided to dedicate this section to the planet that provides us with everything we need. Mars - This is a planet covered with red terrain and rovers. Its surface is covered with rocky ground, while the upper levels are rocky. The Great Red Spot - Here is a huge cloud, an enormous mass of water, ice and gas that is changing shape constantly. Its appearance is very unusual and it is the most massive known storm in our solar system. The Jupiter - Jupiter is the largest planet in the solar system, and its unique appearance is due to its color. It is blue and is also the only planet in our solar system that has a uniform atmosphere, and it is a gas giant. Uranus - This is the second planet from the sun, and it is named for the god of sky and water. The appearance of Uranus is striking and very unusual. Uranus is one of the most mysterious planets in the solar system. Saturn - Saturn is one of the seven planets in our solar system. It is the largest planet in the solar system, and it is also

**What's New in the?**

The app has a simple interface that should be quite easy to handle, thanks to the intuitive layout. There are ten different wallpapers in the pack, each illustrating a different galaxy. The pictures have a high resolution of 1920 x 1200, which means that they should fit well on screens of any sizes. At the same time, the high quality of the pictures gives you the chance to observe millions of stars. If you don't want to include any of the pictures to the rotation, you can simply clear the checkboxes next to the thumbnails. Additionally, it's possible to randomize the order in which these appear on the screen, by enabling the "Shuffle" option from the Windows interface. The way the wallpapers fit to the screen can be modified as well, by choosing one of the available picture positions. Windows comes with several options, namely "Center", "Tile", "Stretch", "Fill" and "Fit". A time delay can be set for the theme, with preset intervals that vary from ten seconds and build up to an entire day. The bottom line is that Galaxy Windows 7 Theme is a nice pack of wallpapers that should make astronomy enthusiasts quite happy. Inexperienced users shouldn't have any issues with installing and customizing this program.

Details

The present invention relates to a reel having an improved construction in a tape cassette. Generally, a tape cassette is constituted of an upper case and a lower case. The upper and lower cases are formed respectively from upper and lower side plates, both of which have an L-shaped cross section. Each side plate is formed with a coil spring. With this construction, when the upper and lower cases are assembled, the coil spring is compressed. A tape reel is also constructed in an L-shaped configuration. A tape is wound on the reel at a predetermined angle. An annular tape guide roller is provided at the center of the lower side plate of the lower case. A tape is guided by the tape guide roller. A tape-takeup shaft is rotatably mounted in the center of the upper side plate of the upper case. The tape-takeup shaft is provided with a thread groove formed along its circumference. A tape is wound on the thread groove. A rotation guide post is provided between the tape reel and the tape guide roller. The rotation guide post is mounted on the upper case so as to rotate together with the upper case. A spring is attached to the rotation guide post. The spring is deflected by the rotation guide post. The spring serves to guide rotation of the tape guide roller and the rotation guide post. The rotation
