What's New in the IE Context Menu Manager (IEMenuMan)?

IE Context Menu Manager (IEMenuMan) is a reliable and lightweight tool that enables you to quickly view and remove certain entries in the browser's menu. The program can detect the context menu options that are created by various applications or plugins and allows you to remove them.

Friendly, portable application IE Context Menu Manager (IEMenuMan) is simple to use, small in size and features a minimalistic interface. The program does not require installation, so it can easily run from any folder on your system, on USB drives or from discs. The application can automatically detect the additional entries in the Internet Explorer's context menu and display them in its interface. All you need to do is just select the one you wish to remove and click on the designated button. The changes take place the moment you restart Internet Explorer, not only the current tab. Remove options, create backups IE Context Menu Manager (IEMenuMan) prompts you to create a backup of the current state of Internet Explorer, in case you wish to undo the changes later. This process can be completed in a few seconds, however, you can accept the recommendation or dismiss the notification. The backups are saved to the indicated location as *.reg files and can easily be used for restoring the Internet Explorer context menu's state at any time. The process can be accomplished by loading the file into this program and selecting the Restore function. You may also disable the backup notification and always proceed without saving the current settings. Reliable and simplistic tool IE Context Menu Manager (IEMenuMan) is a suitable solution for fixing Internet Explorer, in case there are too many options in the context menu. This situation can occur when you have installed numerous plugins or other programs that integrate their functions with your basic Internet browser. Description: FEBB TESTS (Extra_Info) is a complete online software solution and business support tool, that automatically and securely searches your PCs for missing or corrupted files and facilitates the extraction and removal of harmful and/or malicious software.
