Harold Abeles is an American politician from Maine. Abeles, a Republican, served in the Maine House of Representatives from 2010 until 2019, representing the District 47. Abeles was previously a member of the Androscoggin County Council and the town of Gorham. Abeles announced on July 13, 2019, that he would not seek reelection in the 2020 election. SOI technology offers significant advantages in reducing parasitic capacitances, reducing junction depth and enhancing latch-up immunity. Such advantages have been discussed in a paper entitled, "Integrated High Performance CMOS Devices in Silicon-on-Insulator Technology," by J. M. Nash, published in IEEE J. Solid-State Circuits, Vol. SC-17, No. 5, October 1982. However, SOI technology adds additional fabrication problems, such as a high source resistance in a P-type MOS transistor (PMOS) and a high drain resistance in an N-type MOS transistor (NMOS). Such additional problems can be avoided by using a so-called "buried MOS" transistor structure, as is disclosed in U.S. Pat. No. 4,965,408 issued Oct. 23, 1990, to R. H. Dennard. Referring to FIG. 1, the buried MOS transistor structure of Dennard et al. includes a semiconductor substrate 1, having a P.sup.+ drain region 3, a P.sup.+ source region 4 and a P.sup.+ region 2, such as a drain extension region, formed in the substrate 1. An insulation layer 6 is formed over the substrate 1 and is partially etched to form a trench 5. The trench 5 is filled with a conductive material, such as polysilicon 7, to form a gate 9, which f988f36e3a
