What's New In?

----- Internet Researcher is a freeware for offline browsing, searching and saving web pages and full websites. Internet Researcher is a multi-threaded web spider that can crawl up to a thousand web pages per minute. It is very easy to set up, use and customize. You can browse pages with a built-in full text indexing feature and save sites as a single archive file. Internet Researcher can index over 400 categories of content and save them as custom meta-data. Internet Researcher

can optionally record every page you surf with a click of the mouse to get a site-report. Internet Researcher can be configured to pre-fetch links from web pages for fast browsing. Internet Researcher includes an optional Internet Librarian feature that can add category, bookmark and history items to your folders and make them accessible even when the Internet Researcher is closed. Internet Researcher includes a very intuitive user interface. Internet Researcher supports plugins, and you can create and add your own plugins. Internet Researcher supports security plugins and you can make these plugins load automatically on each new download session. Resources: ----- * official website: * download website: * forum: * documentation: * user manual: Internet Researcher is free software and distributed under the GPL (GNU General Public License). How to install/uninstall: ----- You should use the latest version of Internet Researcher found in the Internet Researcher website. If you have the latest version installed you can

uninstall Internet Researcher with the following steps: 1. Close all Internet Researcher applications. 2. From the Start menu, locate Internet Researcher and select "Uninstall". A dialog box will appear asking you to confirm the uninstallation of the program. 3. Click "OK" to confirm and uninstall Internet Researcher. Why Internet Researcher? ----

----- Internet Researcher is simple and easy to use software. Internet Researcher offers free speech and encryption, optional advanced features, and a very intuitive user interface.

Internet Researcher has a Web-based user manual and a forum for support. Internet Researcher includes both, a fully featured multi-threaded web spider and a full-text indexing engine that can process and index over 400 categories of content. You can optionally pre-fetch up to a thousand web pages per minute, keep an Internet Librarian on all your folders and make them accessible even when Internet Researcher is closed. You

System Requirements:

* A 1024x768 display. * One USB port (A USB 2.0 slot will work, but is not recommended). * Mac OS X 10.6 or higher. * Mac OS X 10.7 and higher. * A Mac with at least 2 GB RAM (more is recommended). * Firefox and Chrome browsers installed. * The library files are currently ~24.5 MB in size and can be split into two files, based on your connection speed. (These files are huge.)
