● Lyrics Editor Pro is a software application built specifically for helping you edit and convert lyrics to HTML file format. ● Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. ● You can copy it on any USB flash drive or other devices, and take it with you whenever you need to alter lyrics on the breeze, without having to go through installation steps. ● Clean lineup of features: • The user-interface is divided into two

main panels. You can access the Album Explorer section for viewing the songs detected on audio CDs, and add or edit the lyrics information in a dedicated window. For a better focus on the editing process, you can close the Album Explorer pane and switch to a full screen mode. • Basic HTML text editor: • Lyrics Editor Pro comes packed with a built-in HTML text editor which offers support for basic functions. You are allowed to cut, copy, paste, or delete the selected text, customize the text in terms of font, color, size, and alignment, switch to lowercase or uppercase options, and insert

various symbols from a character map. • What's more, you can apply underline or bold effects, undo or redo your actions, perform search operations, upload lyrics data from HTML files and export it to the same file format, and use hotkeys. • It is important to mention that Lyrics Editor Pro reads music from audio CDs by using the CDDB (Compact Disc Database) method to search for song metadata on the Internet (e.g. artist, track, song). Hence, it automatically reads the contents of your data and fills the missing information. • Last but not least, you can manually edit the information about the

artist, album, data, and album notes, rename the title of each song, and insert logos by uploading a picture from your computer (e.g. GIF, JPG, BMP, EMF, PNG) or specifying a valid URL. Key features: ● Automatic search of song lyrics from the Internet: Lyrics Editor Pro has been optimized to read the music from audio CDs by using the CDDB (Compact Disc Database) method to search for song metadata on the Internet (e.g. artist, track, song). Hence, it automatically reads the contents of your data and fills the missing information. ● Lyrics visualization: You can read and copy the lyrics from

your CD by
