What's New in the Magic Browser Recovery?

Magic Browser is the most popular cross-platform browser for personal computing and mobile devices. Magic Browser is developed and maintained by the MAGIC SOFTWARE LLC. Magic Browser is a free and Open Source tool. It has been downloaded millions of times by people all over the world. Magic Browser allows you to surf the Internet at the speed of your Internet connection and access a variety of functions that make the internet a more fun place to be. Magic Browser is a perfect solution for accessing the latest versions of all browsers, and also to browse the Internet faster, and it also lets you browse the Internet more easily. Magic Browser is a first class browser for Windows, Mac OS, and Linux systems. We have also supported mobile platforms, including Android, Symbian, iOS, and BlackBerry. Install this Magic Browser Recovery program to recover deleted browsing information from all installed browsers. This version is compatible with Google Chrome, Internet Explorer, Opera, and Mozilla Firefox. It can work with all Windows version from XP to Windows 10. Magic Browser Recovery is designed to recover deleted browsing information from all installed browsers. The program also allows you to gather navigation history, downloaded files, auto fill data, cached data, cookies, and so on. Magic Browser Recovery comes in handy if you need to retrieve deleted browsing information on a specific computer. This application is designed to gather various data from all the installed Internet browsers, which could serve not just individuals who want to get browsing history back, but also to behavior analysts and marketing specialists. One of the perks of Magic Browser Recovery is its wizard-based interface. It takes only a few simple steps to extract items such as the navigation history, browser bookmarks, downloaded files, and so on. Furthermore, there is an integrated exporting wizard that makes it possible to save the selected data as an HTML, PDF, or an Excel file. The system analysis takes a bit of time, but keep in mind that Magic Browser Recovery performs a low-level disk scan to retrieve browser data, including items you might have already deleted. The second step is to choose the computer user, while the third enables you to select between all the installed web browsers, which Magic Browser Recovery detects automatically. Retrieves a plethora of information for all browsers For each browser, Magic Browser Recovery displays various information, all in a format that is easy to read. You get to browse through the website history, a list of Internet searches, or visited social media sites. Based on the number of hits, Magic Browser Recovery creates displays the most visited websites. All items in the bookmarks manager of the target browser are also displayed, and a list of download sources is revealed. Magic Browser Recovery also shows the automatic form fill data the browser remembers, as well as the generated temporary files and the images the browser downloaded during navigation sessions. The amount of gathered information might be a bit too large for you to browse it manually, so Magic Browser Recovery comes
