It supports the following systems: Windows: Windows 10, 8, 7, Vista, XP, Server 2008, Server 2003, Server 2000. Hey there, what's up? Kodeline is a simple but addictive puzzle game in which you have to rearrange the pictures to complete the rows. You have a limited time to do that, so it's important to be fast and efficient. HOW TO PLAY: You can either click the image to automatically flip it, or drag it. Alternatively you can also click on the buttons on the top-right corner and drag them to the target screen. If a picture is covered by others, it's going to be cleared. In that case it will appear on the top of the grid. You can also clear it by clicking it to empty all the pictures. You have to click once again on the target screen to place the picture to complete the row. NOTE: If a row is filled with pictures, you can't clear them to do more! You have to clear the pictures by clicking on them as many times as needed until the row is empty. When a row is full, you'll be able to do more... Badland 2 is a puzzle game in which you will have to survive in a dangerous world by planting and harvesting seeds to give your creatures the needed food to grow. The more grown, the bigger your territory. Alonida is a 2D platformer game with a unique puzzle twist. You play as a kid who is traveling alone on a country road.
