Okdo Html To Txt Converter Crack Download

Okdo Html to Txt Converter is a simple application that can process a lot of HTML or HTM files at once, to extract their text content and save it to TXT documents. However, it does not allow you to split files into multiple parts or choose which pages from the source documents should be processed. Offers support for batch conversion If you need to extract content from a large number of HTML files, you can load and process all of them quickly. To simplify this procedure, the application can automatically detect and import all the supported files present within a specified folder. Additionally, you can use drag and drop actions to add new items with less effort. Moreover, it is possible to save a list of all the documents in the processing queue, should you wish to convert them at a later date. Customize output settings The application can save each created TXT file to a separate document and remove any unnecessary blank lines present in the source files. You can also set a custom name for the output document, to avoid overwriting any data in the target folder. Offers limited functionality Okdo Html to Txt Converter is easy-to-use, but it lacks certain advanced features. For example, you cannot preview the source files, split them into multiple documents or extract only specific portions of text. As it stands, the application can be useful if you need to process numerous files at once, but you should try a more complex program if you need to have more control over the conversion operation. Screenshot Publisher Description Okdo Html to Txt Converter is a simple application that can process a lot of HTML or HTM files at once, to extract their text content and save it to TXT documents.
