Orb Icons V.2 - Software 01 [Mac/Win]

Browse and download the free images or buy the Photoshop and Illustrator versions. References See also Category:Software icons Category:2000 software Category:Windows-only softwareQ: Arduino UNO R3 can't change variable/float values from main() I'm testing out some functionality in my code and I can't seem to figure out why my variable values don't change from my main(). I've declared them in the same block, so they are the same scope. I need my float 'Distance' to change, but it doesn't. This is the first time I've used Arduino, so I'm sure I'm missing something obvious. void setup() { Serial.begin(115200); } void loop() { //If I comment out the next line, the Distance is not changed. Distance = x + y; Serial.print("Distance: "); Serial.println(Distance); delay(1000); } A: The reason this is happening is that you're updating your Distance from x+y in your setup function. This means that distance is set to the value of x+y, at the start of the setup function. After that, loop has run and has assigned the value of x+y to distance, which is no longer being updated. The next time the loop runs, distance is the same as x+y, which is the value you printed out, then delayed 1000 milliseconds later. If you want distance to be updated every time loop is run, move your distance = x+y; to the loop function. A Confused Ending A Confused Ending is a play by the British playwright Alan Bennett. It was first performed in 1975 by the Theatre Royal, Bath and first published in 1978 by Methuen. The play features two men discussing their reactions to a film, in which their parents meet and fall in love, and in which one of the men decides to marry the other's fiancée. References Category:Plays by Alan Bennett Category:1975 playsQ: How to use superclass method from subclass to use super class attribute I have two classes which inherit from a parent class, and both classes have their own attributes. I am trying to use the create() method to set both class attributes in the parent class using the super
