Screenshot: I have been trying for more than a week to send video emails from Skype video call. Skype recently changed their system and now it is a mess to do. I found this article and tried it but with no success. This work great. You can record everything on your screen! This is so cool. I'm not a Mac user, but I tried it on my Windows 8.1 laptop and it works great. The camera always looks good on Windows 8.1, so that wasn't the problem. But on my Macbook Air it looked terrible. It always looks like it's being recorded from a laptop. It always looks jumbled up and you just see parts of the desktop being recorded. I have tried Skype, QuickTime and anyother programs, but nothing looks good. So, this program works. I found this program when I was looking for screen capture. It is the best screen capture for recording videos from your PC. I have used it for over a year now. This has got to be the best screen capture software. I have tried a few screen recorders and most of them sucked. This one worked on the first try! It is so easy to use. I
