## **What's New in the Theme Manager?**

Windows 7 Theme Manager is an application designed to help you customize the themes on your computer as well as download and install new ones. With it you are able to swap between existing themes, install new ones in a simple manner, apply different styles for them, set a wallpaper or pick system sounds. Description: Out of all the different games released for the Xbox 360, Red Dead Redemption (an Open World Western themed first-person game) was one of the best. For it's time, the game did everything right and managed to do it with flair. The game is presented as a prequel to the film of the same name released three years prior to the game, where the main character, John Marston, was played by the legend and world-famous actor, John Wayne. This time around, John Marston is played by famous actor, and former oscar winner, George Clooney. Though all the names are changed, the game features all the same characters and plots as the film, but on a different scale. And that's also why the game is so successful, it manages to entertain its audience while providing them with a closer look at the culture and lifestyle of the Old West. Due to it being an open-world, the player is free to do as they please. Choosing from one of three possible character archetypes (the story is roughly the same for all three), he is free to explore the country (or various sections of it), meet new people, and interact with the local townsfolk. The game manages to mix the perfect blend of action, action, and more action while it gets boring for some people to repeat the same sequence over and over. Players have no choice but to explore and interact with the world as they please and the game is solely about the journey. But all that is only half

of the story, the other is the gameplay. The player controls John Marston from a third-person perspective and can control him in a variety of ways, including:

- Shoot With a variety of guns in his arsenal, the player can freely shoot at his enemies. Though they have different attributes, there is little variation in their animations. It's like playing Snake and the enemy doesn't even try to hide. It's difficult to say what the best gun is, there is no clear favorite. This is especially true since you'll see each one working just as good as the other.
- Swim Having been a fisherman all his life, John Marston is a gifted swimmer and can dive to great depths without a problem.
- Jump When you're on land and need to jump across a large gap, you'll find that jumping is quite easy, it'
