What's New In VURL Desktop Edition?

vURL Desktop Edition (vURL DE) is the desktop version of the extremely popular vURL service that we've been running for quite some time now. This application has been developed solely to provide those that like our service, an alternate method of doing such. This edition also helps to

save on my own server costs as it is entirely standalone, requiring only your own internet connection. vURL Desktop Edition will allow you to get and save the source code of your favorite website with just one click and also see the files it links to. It does not require the purchase of an

additional copy of vURL. It does not require any additional downloads. vURL Desktop Edition is ad-supported so it generates an ad from time to time. Tips: Get the source code of a website View a website's source code Navigate between files on a website Helpful tip: In most browsers

you can press F12 to open the developer tools and it will usually show the source code of the page that you're currently viewing. Requirements: Windows Internet Explorer 6 Firefox 1.0 Similar apps: Epiphany Web Browser: vURL Desktop Edition XI XL vX vX1 vX1.1 vX1.2 vX1.3 vX1.4 vX2 vX2.0
