VIPRE Identity Shield is an award-winning anti-malware application that delivers comprehensive protection against the latest malware, including spyware, Trojans, and other types of malware. VIPRE helps you detect, remove and protect your most important digital assets with ease: websites, applications, apps, e-mail and all your sensitive data. Description: VIPRE Privacy Shield is a tool designed to help you block your PC from listening and recording its audio ports. It uses a dual-layer approach, blocking both malicious software and the functionality of the ports. Additionally, it includes many features that can help you stay safe while surfing the Internet or using your PC. Some of the feature include tracking protection and searching for the names of your websites, credit card numbers or personally identifiable information. VIPRE Privacy Shield can help you make sure that your data is safe at all times. It can block your webcam and microphones from being used by cybercriminals and will protect your online identity by preventing tracking records from being created. This feature comes with a built-in antivirus. The detection rates are good, according to the developer, the tool has very effective privacy features and comes with a built-in antivirus. Pros: ☐ Safe browsing option, with the ability to erase and share sensitive data ☐ Can protect against tracking websites ☐ Built-in antivirus feature ☐ Speedy and easy to use Cons: ☐ The app might not be able to protect you from phishing websites. ☐ A manual registration is required in order to use all the features. ☐ You can't access some of the advanced features through the mobile app. ☐ The developer does not offer a one-year free trial. ☐ The app does not offer live chat support. VIPRE Privacy Shield (formerly VIPRE Identity Shield) Free Download

Main features: Warns you whenever your webcam or microphone are accessed Keeps your PC and files safe, protects you from phishing and identity theft Removes your unique IP address from online information Captures and removes stored passwords Removes and protects browsing history, cookies and other local documents Detects all potentially dangerous files and cleans them Supports Windows Vista/7/8/8.1/10 and Mac OS X 10.5/10.6/10.7/10.8/10.9/10.10/10.11 What’s new in this version: Fixed a problem with deleting a local storage by mistake Fixed a bug related to uploads of a local file Fixes crashes Fixed a problem with updating the program This review is for a digital copy of VIPRE Privacy Shield VIPRE Privacy Shield is a easy to use utility that brings an extra layer of protection to your computer. The tool will warn you about an online presence and also identifies any local files that may contain personal data. It also has anti-spyware and anti-theft capabilities, while you can block webcam and microphone. VIPRE Privacy Shield was developed by VIPRE. The developer describes the tool as a privacy-oriented solution that works automatically, in the background, without your involvement. This is a powerful program that can address a variety of security issues and you can use it for your own protection. It is very easy to use and is packed with a variety of features, such as free online security scan and data sanitization. It is very important to keep your computer and files safe. As mentioned earlier, cameras and microphones are a vehicle for identity theft and spying, so the right protection is essential. VIPRE Privacy Shield can help with this issue, as it will prevent hackers from accessing your data. Not only will this stop information leaks, but it will also allow you to find local files that may contain personal data. VIPRE Privacy Shield is easy to use. You will need to run the program and then simply click on the “Monitor” button to start the process. Once that is complete, VIPRE will search for any files that may contain personal data, then displays them on the screen. You can also opt for a deeper scan of your computer. This will show a complete list of all local files that contain any personal data. In addition, the application
