According to a news release from the DHS, the patient is a 27-year-old male from Santa Clara County who was visiting family members in San Francisco. He reported a mumps-like illness starting May 6, but did not seek medical care until May 16. The patient presented to his doctor with malaise, fever and headache, and was diagnosed with uncomplicated mumps. Health officials in San Francisco are investigating to see if there are any other cases of the mumps. The patient was not infectious to others and did not go to any public or private gatherings. Anyone who recently traveled to San Francisco and Santa Clara County is being asked to contact their healthcare provider to discuss the need for vaccination against mumps. The Oldham County commissioners have scheduled a special meeting for this week, to consider a resolution asking the Legislature to end forced and involuntary servitude. The meeting is Tuesday, Nov. 14. Oldham County Commissioner Becky Bumb is sponsoring the resolution. She says they plan to vote on it next week. The Commissioner says that she is proud of Oldham County's role in helping to end slavery in the United States. "There was a Kentucky county that put out an advertisement that slavery was abolished in their county in 1856, and they allowed people to come and work without a master or slave," said Bumb. "I believe the Oldham County resolution would be a good example of a small state taking steps to step forward and lead the country." If the resolution is passed by the commissioners, Bumb says they would like to send a copy to Governor Steve Beshear. It also requires Python to be installed on the computer before you can make use of its hash cracking capabilities. This is a very interesting and useful tool. It's a good idea to keep the user informed of what's going on at all times. The first couple of times I used it, I wondered if something was wrong with my computer, but after that, I got the hang of it pretty quickly. I just wish it was made a little more user-friendly. For instance, I wish it could process a word list faster, without me having to close it out, and the rest of the functions could be displayed in a table or something so I could process multiple hashes without losing my place. Overall, it's a good program, and I would recommend it to anyone looking for a powerful and easy way to crack MD5 hashes.
