What's New In ToolbarStudio?

ToolbarStudio is meant to assist users in creating original toolbars for their browsers. Output files can be saved as installers, complete with digital signatures and license agreement. Easy for beginners and adequate for experts The program is a highly comprehensive toolbar creator suite. The customization options are plentiful; and the great thing is this does not impinge on its ease of

use. This is performed with the help of the built-in wizard. Generating a new toolbar is very quick. Six steps-quick, to be precise. The really great aspect of this software lies in the fact that there is no sacrifice between ease of use and power! Newcomers can create workable toolbars in no time, while more advanced developers can make use of the abundant fine-tuning options. Generating applications with password boxes, checkboxes, custom XMLs and context menus is entirely possible. Social media enthusiasts will also like the add "Facebook and Twitter plugins" functions! Customized toolbars for all kind of needs The generated files can be used for various tasks. Examples include simple or advanced search modules, site banners, magnifying tools, translators and so on. ToolbarStudio does little to limit the imagination of developers! Another interesting program feature is the "Preview" option. This allows users to quickly spot errors or inconsistencies. Not only that, but the resource also comes with a link checker. Buttons that are linked to dead URLs can thus be weeded out, before actually exporting the work. The interface is tailor-made for the job at hand. Although there are multiple options from which to choose from, features are well organized. The built-in wizard is highly informative and helpful. The GUI is geared towards user productivity and satisfaction! A powerful software for web developers To sum up, ToolbarStudio is a great utility for anyone interested in creating highly customized toolbars. The options for customization are more than plentiful and this translates into great flexibility for users. Show more...
