new video 14 Feb 2011 - I have this
going on since 2010 and every single
video game I have had it happen to
me and this is by far the most
informative and useful guide I have
found. I have probably attempted
20/20 times to fix this problem, none
of them have helped me and I have
always given up when it seemed I
could never make a video with 720p.
In the first video I show how I was
able to get past the issue of the UEFI
biometrics being incorrect. In the
second video I demonstrate how I
was able to fix the problem of the
UEFI biometrics not being correct. 2.
