Hezukuri's "Kanōbi no Tsubasa" is a light novel series written by . It is the third of the main story of the visual novel .Q: Selecting two tables in MySQL by their relationship I am new to MySQL and do not fully understand the relationship between tables. I am trying to select data from two tables that are related. Table 1: Persons Table 2: Posts person 1: id name post: id person_id content time I want to select all persons with posts. I tried: SELECT p.id, p.name, (SELECT p.person_id FROM posts WHERE p.id = '\$id') AS post_id, (SELECT post.time FROM posts WHERE p.id = '\$id') AS post_time FROM persons p WHERE p.id = '\$id' but the result is duplicated. If person_id was unique, it would work but I need to know which posts belong to which person. A: You can use LEFT JOIN to join table posts to table persons SELECT p.id, p.name, coalesce(p.post_id, '') post_id, coalesce(post.time, '') post_time FROM Persons p LEFT JOIN posts post ON p.id = post.person_id WHERE p.id = '\$id' Show HN: WebSocket-based data streaming on Cloud Foundry. - mattlic ===== mattlic Hi HN, f988f36e3a
